

Hack this site realistic mission 02

This document is written by Adam and is intended for further understanding of the realistic challenges on HackThisSite. The idea behind this document and the ones that follow is that I am explaining what you will need to do, look for and execute. I will also explain why you need to do what I do in these tutorials to create a better understanding of the vulnerabilities, scenario and exploits used.

Vulnerability: SQLi (Sequel Injection) Injection Attack.

Link: <https://www.hackthissite.org/missions/realistic/2/>

The screenshot shows the American Nazi Party website. At the top, a red banner contains the words "WHITE" and "POWER" in white capital letters, flanking a white swastika symbol inside a black circle. Below this, the text "JOIN THE AMERICAN NAZI PARTY FIGHT FOR WHITE POWER" is displayed in white capital letters. Two announcements follow, each preceded by a horizontal line. The first announcement, "Meeting July 18th posted by WhiteKing", states that the Chicago American Nazi Party will meet on Thursday, July 18, for "Homophobes, racists and bigots unite!". The second announcement, "RALLY AT INS BUILDING posted by Jones", states that people are getting together to discuss organizing an anti-immigrant rally at the INS Building and to stay tuned for details. At the bottom, there are two side-by-side posters. The left poster features a skull and crossbones with a swastika and the text "WIGGERS BEWARE!", "734-729-1702", and "AMERICAN NAZI PARTY". The right poster features a man in a turban and the text "BEWARE!", "WHITE PEOPLE AWAKE!", "WE WANT YOUR JOBS - WE WANT YOUR HOMES - WE WANT YOUR COUNTRY", "734-729-1702", and "AMERICAN NAZI PARTY". A blue "update" link is centered below the posters.

WHITE POWER

**JOIN THE AMERICAN NAZI PARTY
FIGHT FOR WHITE POWER**

Meeting July 18th posted by WhiteKing

The Chicago American Nazi Party will be meeting Thursday, July 18. Homophobes, racists and bigots unite!

RALLY AT INS BUILDING posted by Jones

PEOPLE ARE GETTING TOGETHER TO DISCUSS
ORGANIZING AN ANTI-IMMIGRANT RALLY AT THE INS
BUILDING. STAY TUNED FOR DETAILS...

WIGGERS BEWARE!
734-729-1702
AMERICAN NAZI PARTY
P.O. Box 503 Esapeointe, MI 48021

BEWARE!
WHITE PEOPLE AWAKE!
WE WANT YOUR JOBS -
WE WANT YOUR HOMES -
WE WANT YOUR COUNTRY
734-729-1702
AMERICAN NAZI PARTY
P.O. Box 503 Esapeointe, MI 48021

[update](#)

First, analyse the webpage, look at the HTML source (ctrl U) and look for any comments in the code that could provide any useful information.

Next step would be to analyse any possible links (remember to always read the link before clicking), in this case, the link you will want to follow is the “update” link. This link may not always be visible to you so zoom in and out of the webpage to see if there are any hidden links, also `CTRL A` to see if any links are high lighted, some links may be hidden in plain sight.

After you have fully analysed the webpage the next step would be to click the link “update”.

enter your username and password, white brother!

username

password

Submit Query

You will be taken to a second web page which is a login page, however, you do not have any login credentials of any kind so at this point you would be stuck, however remembering that this website has an SQL database we can inject SQL queries into the username and password fields until the correct query is injected and therefore bypassing the login phase with legitimate credentials. SQLi allows the hacker to log into the login field without the correct login credentials, therefore bypassing the login phase.

In this instance, the correct query is `>' OR '1<`. Other queries `>' or '1'='1<` basically meaning that if `1 = 1` then the answer is true and the correct condition is returned. SQLi injections are just queries to get a result back from the SQL database.

Result:

enter your username and password, white brother!

username

password

Submit Query

Correct!

It's good practise to analyse HTML and Java code.
